- Separate MIDI output allows controlling external samplers, synths and other equipment
- Runs via USB bus, batteries or power adapter (not included)
- 3-Year Warranty Program\*\*
- Conceived and designed by BEHRINGER Germany

The U-CONTROL UMA25S is an extremely versatile, 25-Key USB/MIDI master keyboard controller that is ideally-suited for a wide range of performance and recording applications. Need independent control of hardware synthesizers or general MIDI sound modules? How about control over effects devices? Maybe you just want to operate sequencing software, or computer plug-ins from a more convenient remote location?

The UMA25S provides total flexibility and tremendous ease of use, thanks to its 25 velocity-sensitive keys, 21 independently-assignable controllers – and MIDI output. Add it all up, and the UMA25S gives you the kind of control needed to realize your ideas quickly and intuitively. And we even sweeten the deal, the UMA25S also features a built-in USB/MIDI audio interface – for plug and play recording directly to your PC or Mac\* computer!

Keyboard with Audio Interface

## What is a MIDI Controller?

Simply put, a MIDI controller gives you the power to take command of any hardware device or software that understands MIDI (Musical Instrument Digital Interface). This means that MIDI addressable effects processors (such as delays, reverbs, etc.) and audio recording and editing software can be controlled with a single piece of hardware, a MIDI controller. This can be very handy indeed when you have lots of devices spread all around your workspace or stage.

## Velocity-Sensitive Keys

Every UMA25S controller features our custom-designed, velocity-sensitive key-bed, which has been praised by the industry's top product reviewers and players alike, for its responsiveness and playability.

## More than MIDI

There are some things that just bear repeating. In addition to providing 25 velocity-sensitive keys for the slickest set of glissandos and snappiest arpeggios, the UMA25S also functions as a full-fledged USB audio interface for recording and podcasting. This powerful interface features a built-in mic preamp with dedicated Gain control, a Phones Output with its own dedicated Volume control, and stereo RCA I/O jacks for connecting external devices. The interface is so versatile, it even allows simultaneous recording of the Mic and Line inputs.

## Recording & Editing Toolkit

To get you up and rockin' right away, we've included a free download for some popular and easy-to-use recording, editing and podcasting software, plus more than 100 virtual instruments and 50 effects plug-ins. Jam with a virtual e-piano or take off with breathtaking synthesizer sounds, or tweak your sounds with classic-style tube amps and multi-FX – plus high-end studio reverbs, equalizers, compressors, choruses and much more.

## 21 Assignable Controllers and 16 User Presets

When it comes to remote control, the UMA25S offers more real-time options than anything in its class. You get 8 knobs, 8 buttons, 2 wheels (Pitch Bend & Modulation), 2 pedal ports (Expression & Sustain) and 1 fader, for an amazing 21 assignable controllers – total control of your operating environment. Once you've assigned the parameters for a particular scenario, simply store it in one of the 16 available preset locations.

## Accessories

MIDI controllers don't typically come with many extras. But the UMA25S is designed to do so much more than just turn things on and off, so we provide gadgets galore. In addition to the software mentioned above, you also get a:

- High-quality headset with built-in mic for podcasting and recording
- Soft carry bag with enough pockets for cables, power supply, CDs, etc.
- Guitar-style strap, so you can steal the spotlight from the guitarist and start building your own bevy of fans

### Here's Why You Need a UMA25S:

- For playing external sound modules, rack synthesizers and virtual instruments
- For editing sound parameters of synthesizers, sound samplers and GM/GS/XG sound generators
- Controlling parameters on effects devices and software plug-ins, such as effects processors, compressors and digital equalizers
- Controlling software mixers remotely (functions for volume, pan, mute, etc.)
- Controlling transport functions remotely (Play, Fast Forward, Stop, etc., which is also known as MMC, or MIDI Machine Control) on sequencers, hard-disk recorders, drum machines, etc.
- Live control of volume and sound parameters of MIDI modules on stage

### Compose. Record. Mix. Share.

Tracktion is one of the world's fastest and easiest Digital Audio Workstations (DAW) for composing, recording, editing, mixing and sharing your music with the world. Featuring a single-screen interface, and pushing the envelope in design elegance, Tracktion brings together outstanding Pro DAW features, such as dynamic automation, unlimited track count, MIDI recording and support for VST and AU plug-ins. This powerful music production software gives you all the tools of an entire professional-grade recording studio. Learning a DAW has never been easier, thanks to their vast and readily available library of resources.

As our way of saying "Thank You", when you register your U-CONTROL UMA25S at [behringer.com](http://behringer.com), we'll reward you with a complimentary download code for the full version of Tracktion. Recording and editing couldn't be easier. To learn more about Tracktion, visit [tracktion.com/support/videos](http://tracktion.com/support/videos).

Share the Love. Visit [tracktion.com](http://tracktion.com) for more.
