## Works with Any Roland Drum Pad

The TMC-6 works with the full range of Roland drum pads—from our entry-level gum rubber pads to our patented mesh-head V-Pads. Just connect a drum trigger cable and you're ready to play. The TMC-6 even supports separate head and rim shot triggering when used with the PD-120 and PD-80R V-Pads, and the three-way triggering of our CY-15R and CY-12R/C V-Cymbals.
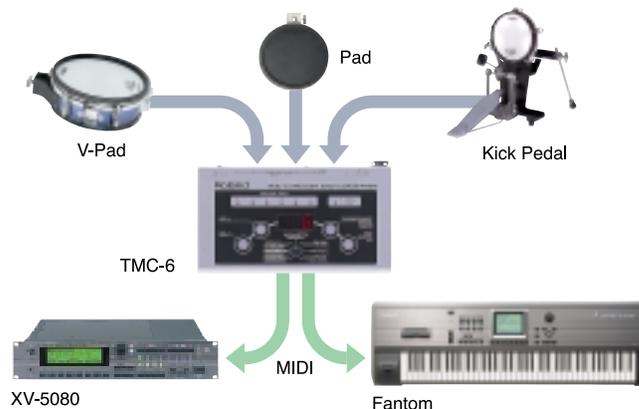

Great for Acoustic Drums

When paired up with acoustic drum triggers, you can use the TMC-6 to trigger a sampler or other sound module from your acoustic drum set. Tap into a universe of sounds with this easy-to-use bridge.

Trigger MIDI Modules

With the TMC-6 and an electronic percussion pad or acoustic set with triggers, you can play high-quality drum sounds from MIDI instruments like Roland's Fantom* workstation or XV-5080 module.

Expand Your V-Drums Kit

Use the TMC-6 to add more pads to your V-Drums kit, even if your module is out of trigger inputs. Now you can have those extra V-Cymbals and rack toms you've been dreaming about.
