Hypersonic 2

Read Me – Universal Binary Update

Steinberg Media Technologies GmbH
April 2007

What is new?

This Universal Binary update brings support for the Mac Intel platform.

Download instructions

- Download "**Hypersonic2_UB_Update.dmg**" file to your desktop.

- Double-click "**Hypersonic2_UB_Update.dmg"**

- The folder includes installer for VST, AU and Rewire.

Installation

[1] Installation of Syncrosoft Licence Software

If you have already installed your Syncrosoft Licence Control Software please continue with step [2].

- Double-click the "SyncrosoftLicenceControl.mpkg" file located in the "Copy Protection Driver" folder of your product DVD. Follow the on-screen instruction.

- Make sure to have your Steinberg Key connected to your Mac.

[2] Installation of Hypersonic 2 Universal Binary Plug-In

- Please double-click desired file (e.g. "Hypersonic 2 VST.pkg") to launch the installer.

- Follow the on-screen instructions.

[3] Installation of Hypersonic Content Data

- Please drag the folder **"Hypersonic 2 Content"** from your product DVD onto your hard disk. You can put the folder anywhere you like, including external hard drives.

- When copying has finished, please open the **"Hypersonic 2 Content"** folder on your hard drive and double-click the file **"Set HS2 Content Location".** This tells the plug-in where to find the data.

Technical Support

Steinberg product specialists are also on hand to provide individual assistance at:

www.steinberg.net

Please note, in order to receive technical support and information, you have to register your product after Installing.
